

## AMD Mini™

### Airless Metered Dose Pump Dispensers

The **AMD Mini™ Airless Metered Dose Pump Dispensers** are engineered for dose accuracy with a professional and cosmetic appeal. They are designed to preserve air-tight containment while maintaining the formulation's integrity, allowing for easy and accurate dispensing. These airless dispensers are specifically made to handle high-viscosity products, making them ideal for thick creams and viscous liquids.

Precise and repeatable metered dose dispensing (0.30 mL/pump)\*

*Pumps & Caps sold separately from 15 mL and 30 mL Bottles for added flexibility of metered dosing options.*

#### Bottle Size Options:

- 15 mL (Clear)
- 30 mL (Clear)

#### Features:

- ✓ 0.30 mL output\*
- ✓ Bottles and pumps are made of polypropylene
- ✓ Easy top-filling
- ✓ Snap-lock pump for tamper resistance
