

VersaCream™ PRO

Vanishing Cream Base

VersaCream™ PRO is an elegant and versatile vanishing cream base designed for topical and vaginal applications with a proprietary formula specific only to SpecializedRx. It is formulated as a high penetrating vanishing base with excellent API carrying capacity (including salt forms) that demonstrates physical stability over a wide pH range. It was designed to promote drug delivery of both lipophilic and hydrophilic APIs, allowing for a diverse range of topical formulations. It is extremely useful over a wide range of pharmaceutical and cosmetic applications. Typical use applications include topical, vaginal, cosmetic, dermatological, and numerous veterinary applications.

B0258-60	2.5 kg	72467-0258-60
B0258-65	5 kg	72467-0258-65
B0258-70	10 kg	72467-0258-70
B0258-72	15 kg	72467-0258-65

Highlights:

- ✓ Elegant white
- ✓ Long-lasting moisturizing effect
- ✓ Versatile over a wide pH range
- ✓ Oil-free
- ✓ Contains allantoin* to promote skin health for repeated use
- ✓ Lipophilic and hydrophilic API compatibility
- ✓ Smooth, non-greasy sensory properties, tact-free skin feel
- ✓ Formulated to promote skin health and rejuvenation
- ✓ Typical pH: 5.5-6.0
- ✓ Hypoallergenic
- ✓ Non-comedogenic
- ✓ Meets the requirements of USP <51> antimicrobial effectiveness testing
- ✓ Salt-stable
- ✓ Readily incorporates oil or water soluble actives
- ✓ Compatible with many common botanicals, penetration enhancers, and wetting agents
- ✓ Free of dyes, fragrances, soy, BHT, EDTA, urea, parabens, and petrolatum

*Allantoin (glyoxyldiureide) is a compound that helps hydrate the skin, reduce itchiness, heal minor topical injuries, and improve overall skin texture and appearance. Its soothing properties are especially beneficial for dry skin, as it helps to moisturize, repair, preserve, and promote overall skin health. It is a functional ingredient ideal for areas with repeated applications.

No claims are made for the use or suitability for any therapeutic indications. Practitioners are advised to compound in accordance with professional standards for individual patient needs, considering ingredients and finished product suitability.
